

## AUTOMATIC 3 HANDS WITH DUAL TIME AND OPEN HEART

### A) DISPLAY

### B) WINDING THE MAINSPRING

Automatic winding watch can be hand wound by turning the crown in it's normal crown position. Wind 15-20 times and it will start to move naturally after shaking slightly.

### C) TIME AND DUAL TIME SETTING

#### I. Time Setting

1. Pull the crown to position 2.
2. Always turn the hands clockwise to set the HOME TIME.
3. Push the crown back to position 1 after setting the time.

#### II. Dual Time Setting

1. Pull the crown to position 2.
2. Turn the hands backwards (the Hour Hand of the Dual Time remains static while all the other hands are moving backwards.)
3. Continue turning the hands backwards to the desired Home Time that differs from the Dual Time.
4. Adjust the hands clockwise to set the Home Time (the Hour Hand of Dual Time will move forward simultaneously).
5. Push the crown back to it's normal position after the time is set.

#### NOTE:

**This watch MUST be worn for at least 8 (Eight) hours each day to ensure it is fully wound.**

**An automatic watch will only wind when the watch is on your wrist and your arm moves.**

**Winding the watch by the crown will put power on the spring but not enough to allow the watch to function fully.**

**If your watch stops overnight or loses time it means it is not being fully wound.**
